## SKILLS

### PROGRAMMING

TypeScript • ReactNative • Deno • Clojure  
React • NextJs • Angular • NodeJS  
Python • Postgres • HTML/CSS  
Portainer • Azure • Docker

### TOOLS

Android Studio • AWS • Pathom Viz  
Pulumi • Flask • Git • UNIX shell  
Adobe Illustrator • Adobe After Effects •

## LANGUAGES

**ENGLISH** | PROFICIENT USER  
**GERMAN** | INDEPENDENT USER

## EXPERIENCE

### DOCKETAI | SR. SOFTWARE ENGINEER

May 2024 - Present | Bangalore, India

- Engineered **AI Seller Agent** (Dashboard, Configuration, Agent Experience) a **highlight at Gartner CSO event** generating significant business leads.
- Developed **DocketAI Agent for MS Teams** extending core app functionality to the Teams platform.
- Developed **Knowledge Lake** enabling files upload, preview, and **secure internal/external file sharing**.
- Tech Stack: **NextJs, Vue, Python, Docker, AWS, Azure, Rust.**

### ANQ FINANCE | SR. SOFTWARE DEVELOPMENT ENGINEER

May 2022 - May 2024 | Bangalore, India

- Improved **App startup** time by **70%** and **reduced app size** by **40%**.
- Achieved daily **98.9%** sessions **without crashes** and **99.01%** sessions **without ANRs**.
- Reduced build times** by **70%** and **73.68%** for IOS and Android respectively.
- Tech stack used includes **NextJs, ReactNative, Deno, Azure, Portainer, Adobe After Effects.**

### VADELABS | SOFTWARE DEVELOPMENT ENGINEER

May 2021 - April 2022 | Bangalore, India

- Developed **Vade Atlas module**, which is the cornerstone of all Vade components.
- Implemented a **robust and scalable** front-end system using industry-standard **design patterns**.
- Tech stack used includes **Clojure, React, NextJS, Pulumi, Nomad, AWS.**

### POSTMAN | SOFTWARE DEVELOPMENT ENGINEER - INTERN

Jan 2020 - April 2020 | Bangalore, India

- Played an integral role in the development of the **Postman collection feature** within the application.
- Developed a Postman collection for team GitHub operations for streamlining workflow.
- Tech stack used includes **Javascript/Typescript, Node/Express, and Redux**, to implement features.

### GOOGLE SUMMER OF CODE | SOFTWARE DEVELOPMENT ENGINEER - FREETYPE

May 2019 - Aug 2019 | Remote

- Developed a **cutting-edge tool (ftinspect)** to test the **FreeType library**, which enabled greater control over rendering parameters.
- Collaborated with senior developers to identify and troubleshoot technical issues.
- Tech stack used includes **C/C++, Qt, and Unix build tools**

### NEWSGATOR | SOFTWARE DEVELOPMENT ENGINEER

May 2020 - Dec 2020 | Bangalore, India

- Developed the **News8r platform**, enabling journalists to license stories to news channels.
- Collaborated with cross-functional teams on testing, and delivery of high-quality software.
- Built **RESTful APIs integrating third-party services**, ensuring system reliability.
- Tech stack used includes **Angular, MongoDB, AWS, HTML/SCSS**

## PROJECTS

### DOCKETAI SELLER | LEAD DEVELOPER

Engineered the **AI Seller Agent** (Dashboard, Configuration, Agent Experience), a key solution highlighted at the **Gartner CSO event** which generated significant business leads for DocketAI.

### DOCKETAI TEAMS | LEAD DEVELOPER

Spearheaded the launch of the **DocketAI Agent for MS Teams**, successfully extending core DocketAI application functionality and features to the **Microsoft Teams platform**.

### KUBERA | PROJECT MANAGER

Spearheaded the creation of a robust **lending platform**, significantly enhancing the firm's **credit solutions** and contributing to its financial innovation.

### CODINGBUDDY | PROJECT OWNER

Developed CodingBuddy, an advanced GPT-3.5 AI solution, to provide instant coding resolutions with potential for a GPT-4 upgrade.

### FTINSPECT | CONTRIBUTOR

Developed tool called **ftinspect to test the FreeType library**, which allows control over all rendering parameters.

### KIWIX | CONTRIBUTOR

An **offline browser providing access to top educational websites**, including Wikipedia, TED Talks, and Stack Exchange, in multiple languages for seamless knowledge retrieval.
